

Copper water bottles

Short description:	Custom water bottles with copper vacuum insulation
Long description:	<p>Personalised water bottles don't get much more practical than this. With a 650ml capacity and copper-plated inner wall, they keep drinks hot for up to 12 hours and cold for up to 48 hours – perfect for days out or taking to the office.</p> <p>Made from high-quality stainless steel with a durable, scratch-resistant powder coating to prevent condensation from forming, each custom water bottle benefits from a leakproof screw-on lid – so you don't have to worry about your stuff getting soggy. The wide opening is great for ice cubes, too.</p> <p>Our reusable water bottles come in six different colours, including black, white, grey, navy, red and lime. We use a 360-degree digital printing method to ensure your design wraps all the way around the water bottle for maximum impact.</p>
