

## Framed glow in the dark posters

**Short description:**

Framed glow in the dark art prints – exclusive to Prodigi

**Long description:**

Your wall art range just got an upgrade. Give your designs the ultimate glow-up with our glow in the dark posters and framed prints, available to order exclusively through Prodigi.

Perfect for displaying graphic illustrations, abstract art and typography designs, our glow in the dark paper benefits from a beautifully soft texture and a clean, matte finish, serving as a stunning work of art during the day and a glowing masterpiece when the lights go out.

Each print is produced using a specialist print technology that allows you to select which parts of your image glow in the dark. Learn how to prep your image files for glow in the dark printing with our step-by-step guide.

Once printed, we'll hand frame your poster in the frame colour of your choice, before fitting it with a durable Perspex glaze. Choose between our handmade satin-laminated classic frame or box frame made from solid ash.

Our framed glow in the dark art prints come in sizes ranging from 6x6" to 40x40" and are delivered ready to hang for speed and convenience.

Please note: Areas defined as white or transparent in your artwork will emit a luminous green-blue glow. To activate glow in the dark elements, artwork should be exposed to 30 minutes of bright or natural light, before being displayed in a completely dark room. The more light charge your glow in the dark prints receive, the brighter they'll glow. Eventually, the glow will begin to fade, indicating that more light charge is needed.
