

Stretched Canvas

Short description:	Superior canvas prints designed for trade and retail
Long description:	<p>Each stretched canvas begins with a 12-colour giclée print produced from one of three individually curated substrates. We then make a custom wooden frame - in any size needed up to a maximum of 3 metres - and stretch the rolled canvas print over it.</p> <p>The stretched canvas print is then hand finished by an experienced canvas framing team; ensuring each corner fold is perfectly smooth, tight and that all fixing staples are covered with special protective tape.</p> <p>Choose from 19mm, 38mm or 44mm European knotless pine canvas frames (stretcher bars) finished with your choice of canvas material. We also offer a premium stretcher bar in 38mm, made from a heavy, superior quality wood.</p> <p>The thickness of your canvas stretcher bar determines how far the canvas print will stand off the wall. Each canvas frame is milled with a curve profile; minimising contact with the face of the canvas; preventing unsightly impression marks and surface cracking.</p> <p>We use finger jointed canvas frames which create corner tension helping resist warping. For larger sizes, we add wooden 'wedges' to each corner; ensuring the canvas surface remains taut and allowing easy restretching in future years.</p>
Features:	<p>Pro-lab print process with 100+ year colour guarantee</p> <p>Choice of four different canvas print media</p> <p>Choice of three canvas frame depths: 19mm, 38mm or 44mm</p> <p>Four canvas edge finishing options (black, white, image wrap, mirror wrap)</p> <p>Professional artist stretcher bars milled from the finest quality European kiln-dried knotless pine</p> <p>Tensioning 'wedges' and finger joints</p> <p>Handmade by experienced canvas farmers</p>
Wholesale cost:	From £11.00
Manufacturing time (hours):	48- 72
Available sizes:	10x10" to 72x50"
Manufacturing countries:	 USA  Europe  Australia  UK
Product materials:	Canvas
Eco credentials:	 Printed using water based inks  Local fulfilment reduces carbon emissions
Printing method:	UK: Giclée USA: Solvent jet ink material AUS: Latex Inks (water based)
