Stretched canvas

Superior canvas prints designed for trade and retail.

Each custom stretched canvas begins with a 12-colour Giclée print, produced from a choice of substrates. We then make a custom wooden frame from European knotless pine - in any size needed up to a maximum of 3 metres - and stretch the rolled canvas print over it.

We use finger jointed canvas frames to create corner tension which helps to resist warping. For larger sizes, we add wooden 'wedges' to each corner; ensuring the canvas surface remains taut and allowing for easy re-stretching in future years.

- Pro-lab print on demand process with 100+ year colour guarantee
- 38mm canvas depth
- Four edge finishing options (black, white, image wrap, mirror wrap)
- Stretcher bars milled from the finest quality European kiln-dried knotless pine
- Tensioning 'wedges' and finger joints
- Handmade by experienced canvas framers

Eco canvas

Eco-friendly canvas prints made from recycled materials.

Made entirely from recycled plastic bottles and stretched over a lightweight, recycled frame, our custom eco canvases are a great way to introduce some sustainable art to your online store – even the packaging is made from 100% recycled content! Better yet, they're almost half the weight of traditional wooden canvases and cheaper, too.

Available to order in four sizes in both square and rectangular formats, these recycled canvas prints feature a black backing with an integral hole for easy wall hanging in just 120 seconds (without the need for power tools).

Your design is recreated on eco canvas using our 12-colour Giclée printing process, before being hand-finished by our expert canvas framers. Plus, each recycled satin canvas comes with an internal corner system that helps keep corners nice and taut – no messy external folds in sight.

Choose from a black, white, mirror wrap or image wrap edge to finish your gallery wrapped canvas.

- Handmade by specialist canvas framers
- 100% recycled materials and packaging
- Available in four sizes (square and rectangular formats)
- Built-in hanging hardware (portrait or landscape positioning)
